

Digital Accessibility for Magni Telescopic Handlers srl – Società Unipersonale

We firmly believe that the Internet should be available and accessible to all, and we are committed to providing accessible touchpoints to as many people as possible, regardless of their circumstances and abilities.

To this end, Magni Telescopic Handlers srl – Società Unipersonale works with AccessiWay, a partner specializing in digital accessibility, to adhere as closely as possible to the Web Content Accessibility Guidelines (WCAG) of the World Wide Web Consortium (W3C).

These guidelines explain how web content can be made accessible to people with a wide range of needs: blind or visually impaired people as well as people with motor, cognitive, neurological or sensory disabilities.

WCAG compliance and technical support from AccessiWay help us to ensure that the website can be used by the widest possible audience, in accordance with the principles of inclusion and applicable regulations.

Despite our efforts to give everyone the opportunity to customise the website to their needs, there may still be pages or sections that are not fully accessible, are in the process of being made accessible or for which there is no adequate technical solution to make them accessible.

We are constantly endeavouring to improve our accessibility by adding, updating and improving options and features as well as developing and introducing new technologies. All of this is done to achieve an optimal level of accessibility and to keep up with technological advances.

If you wish to contact the website owner, please use the following email address:
accessibility@magnith.com

We are currently in the process of updating the website and adapting it to the WCAG accessibility criteria. The official Accessibility Statement will be published shortly, once the technical analysis of the content has been completed and all errors found have been corrected.
